PRESS AUTOMATION

Performance Enhancement
in Forming Technology

WELCOME TO THE TECHNOLOGY LEADER FOR PRESS AUTOMATION

With nearly 200 employees, Automatic-Systeme Dreher GmbH has been the leading system supplier for highly productive automation solutions in forming production processes for more than 50 years. Whether for current applications or for new ideas that will sustainably form the future, we offer you the suitable approach to optimize your production process.

Exceed Your Production Targets

Full Service

A sustainable partnership with our customers is our top priority.

DREHER Automation not only guarantees optimal availability with maximum system endurance but also fast returns on investment.

Press Automation

Whether coil handling or blank handling:

Regardless of the initial material and with a focus on the entire forming process, DREHER Automation supplies turnkey and fully automated forming systems.

Press Retrofit

Increased demands or loss of production?

Press retrofits are genuine alternatives to expensive and time-consuming new procurements. DREHER Automation reconditions and updates your press shop.

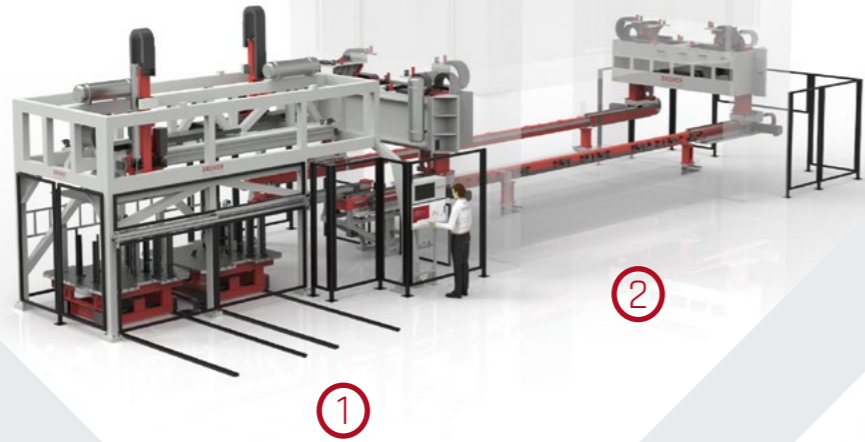

Forming Technology

From the stamping press to the press line:

DREHER Automation offers you holistic system solutions in both sheet metal forming and massive forging.
